Computer Science Documentation

Names: Pirante, Chan, Madamba, Baliguat
Section: Barium

The reason why your group chose the topic

- As students, and as scholars, oftentimes in our environment we are taught about the effects of how improper management of waste can damage our environment as a whole. Leading to things such as climate change and global warming. Despite all the efforts of spreading awareness online, it sadly isn't enough. Everyday in Butuan, we can see pieces of trash everywhere, may it be in schools, malls, sidewalks, or even fast food chains, this proves how evident waste management truly is in our lives. Our website "EcoVive" aims to reduce this problem that is very present not only in our city but globally. Even if it seems like something small, we can always start with baby steps. We chose this topic because we care about our environment and aim to aid our society to a better tomorrow. One step at a time, we can revive how we see tomorrow.

The individual contributions of each group member

Member	**Contribution**
Pirante	● Helped with the coding process ● Chose the topic for the website ● Helped ideate the content of the website
Chan	● Helped with the coding process ● Thought of the content of the pages ● Helped ideate the content of the website
Madamba	● Ideating concepts ● Created the logo for the website

	• Documentation
Baliguat	None Reasons: 1. Doesn't participate in the making of the project during face to face classes 2. Can't be added to the group chat (Account problem)
